

MBG T2 is Mason, Bruce & Girard's updated forest inventory data management system. MBG T2 allows users to collect, store, and update forest inventory, map forest stands, and plan forest management activities. Our software can be deployed on a desktop or securely in the Microsoft Azure cloud.

MBG T2 offers the tools users need to:

- ✓ Import and update data
- ✓ Map stands
- ✓ Plan data collection
- ✓ Project forest growth
- ✓ Merchandize timber
- ✓ Produce standard and custom reports

Key data are displayed on a customizable dashboard visible on the MBG T2 landing screen. With MBG T2, users can have unparalleled access to their data, visualize their data, plan data collection, and plan forest management.
